HOW IEM WORKS

Intelligent Enterprise Messaging (IEM) utilizes both Internet and Cellular networks to deliver timely and short messages to consumers. It requires minimal or no capital expenses for our clients, it is presented as a browser based service.

Wireless network is a proven, reliable and growing technology which is widely known, used, and encouraged by Icons of Industry and used by dominant majority of consumers, therefore an investment in this technology is an asset for a long run.

ABOUT US

OnWire Inc. is a South Bay company specializing in Internet Business Solutions. OnWire Inc. has been in operation since 1995 and incorporated in early 2003. Our focus is to provide cutting edge technology for Sales and Marketing organizations. We specialize in Wireless and eCommerce Applications.

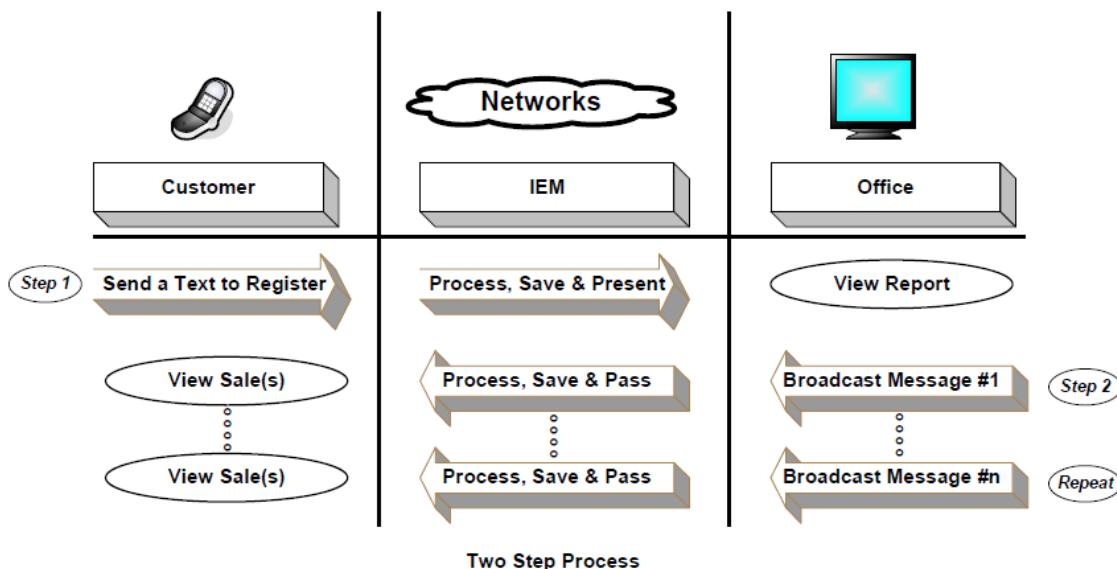

OUR FOCUS

Our focus is Intelligent Messaging Solutions based on Simplicity and Broad Reach to mobile phones, as the dominant device of choice for consumers.

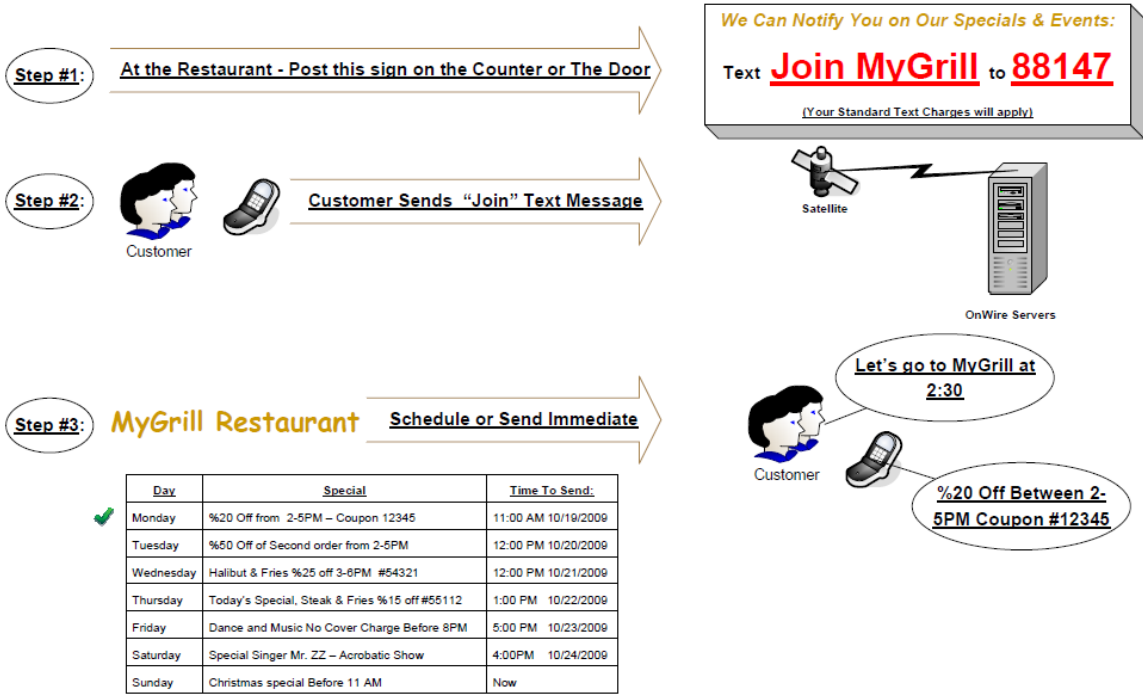

HOW TO USE IEM

IEM is designed for simplicity and ease of use, all handshakes and synchronizations are handled internally which is transparent to user. It includes a simple presentation layer for the office use.

1. **Customer:** Send one text to register with system.
2. **Client office:** Send Specials to registered customers as required.
